ACKNOWLEDGEMENTS

I would like to express my sincere gratitude to **Dr. Sarah Jenkins** and my distinguished supervisor **Prof. Alan Turing** for their continuous guidance throughout this research project. Their invaluable support and feedback made the completion of this thesis possible.

TABLE 1: METRICS

Parameter	Baseline	Optimized
Throughput (MB/s)	142.5	589.2

Column A: Primary observations indicate robust convergence across all test iterations.

Column B: Secondary benchmarks demonstrate a 4x reduction in client latency overhead.

Multilingual Support: Verification and Testing (हिन्दी)
